C originally constructed in the 1920's, this historic, 7,250 square foot theatre underwent interior renovations and upgrades. Preconstruction services prepared the team for construction phase work that included, an upgrade to the entrance lobby space and finishes, a new stage proscenium, upgrades to the audience chamber of 253 seats with new seating, finishes and new balcony / ceiling lighting for the stage and house.

The theatre also received an upgraded multi-media conduit and support infrastructure, a new back of stage exterior access door, replacement / upgrade to the interior electrical and mechanical systems, a handicap accessible lobby bathroom, theatrical lighting, stage rigging, fire protection and electrical systems.

The team completed the renovation under a tight deadline enabling Suffolk's Theatre Department to open for their Fall production.
